

Elevate Billing Solutions by Nobility

About Elevate

Dental professionals, from general dentists to oral surgeons, want to focus their energy on serving their patients, but the distraction of billing hassles can make it seem impossible. And if enough time isn't devoted to properly supporting billing processes, your practice inevitably loses money.

Elevate to the rescue. Elevate was developed by dental industry professionals who recognized that billing activities in dental practices were hindering financial stability and growth and limiting time that should be dedicated to patient care. Our solutions help you restore control over your time and stabilize your revenue cycle, so you can provide optimal attention to your patients.

Unlike many companies in our industry, Elevate customizes solutions to meet the needs of your practice. We never take a "one size fits all" approach because your practice is unique. We also offer a complete suite of services to complement our billing solutions,

including insurance verification, credentialing, consulting, financing, and more, so we can scale with you as you grow. And every interaction we have with you is inspired by our values of Performance, Transparency and Communication.

Our parent company, Nobility RCM, is the leader in revenue cycle management solutions for medium to large medical practices and healthcare organizations. Backed by the technological innovations and leading-edge resources of Nobility, Elevate delivers solutions designed specifically for the dental industry and proven to improve profitability.

Why Elevate?

When you select Elevate to manage your billing, you're not outsourcing to us, you're partnering with us. We assign an experienced billing professional to your account who meets with you regularly to provide metrics-driven reporting on our performance. Words are fine, but numbers ultimately tell the story. We don't hide behind complex systems; you'll know what we know when we know it.

Most notably, we offer Elevate Pre-Funding, available exclusively to our clients. Pioneered by Nobility, Elevate Pre-Funding provides qualifying practices with 100% predictable revenue. We pay your claims and then collect from insurance companies on your behalf, giving you immediate access to capital alongside our all-inclusive billing solution.

Take your dental practice to the next level with Elevate.

The experts at Elevate Billing Solutions by Nobility increase your profits and improve your dental practice's financial health, so you can focus on what's most important - your patients.
